

# NGQ Series Wide Blade

## Winglet Series High Performance, Low Noise Propeller System For Use On Direct Drive Engines

2 Blade  
72" to 76"

Our integrated tip winglet works to minimize the tip vortices that cause drag and reduce propeller performance. This enables us to force the thrust line farther down the blade and take airboat Propeller performance to the next level. The tip winglet also helps decrease the sound signature of the propeller while increasing propeller loading.

Sensenich is pleased to bring this latest airboat propeller innovation to the market. Sensenich's Winglet Series of propellers will improve your airboating experience. Our NGQ Series of ground adjustable propellers is designed to have the best characteristics of a hunt style propeller along with reduced sound and increased fuel economy. This propeller system will produce a tremendous amount of low end thrust. Suitable for 240 HP up through 500 HP.

*This blade features:*

### Recommended Combinations:

- 240 to 350 HP  
2 Blade 72" - 76"
- 350 to 450 HP  
3 Blade 74" - 78"
- 450+ HP  
4 Blade 76"

### Geared Aircraft

- GO - 3 Blade 74" - 78"
- GSO - 4 Blade 76" - 80"
