

Sensenich allows for 8” of total pitch change throughout the life of its aluminum propellers.

We liken it to a Coke can.... the more you bend it back and forth, the weaker it becomes.

Below are the Median Pitches of the propeller, meaning the pitch at which the raw forging arrives in house.

Median Pitches

69CK	50
70CM	77
72CK	54
72FM	81
74DR	59
74CK	45
74DM	60
